INTRODUCTION

Typically, supplements are not fully used by the body, instead they simply "pass through."

That kind of wasted nutritional "support" is the single most important reason why we researched and put together the balance ingredients of *equizyme*[™] .

equizyme[™] **optimizes cellular delivery** with the support of active enzymes combined to ensure that your horse actually absorbs our supplements.

All **Medallion**[™] products contain *equizyme*[™] which enhances absorption and helps prevent waste.
